DETAILED ACTION

Drawings

1. Figure 23 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claim 3 is objected to because of the following informalities: In lines 3 and 5, both instances of the word "second" should be deleted since it is indefinite and confusing since it raises the issue of its structural relationship with a first exhaust port and a first insertion hole. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 4-17 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claim 4, the claim is indefinite since it recites in lines 2-4, a plural recitation of “the paste contents” when only “at least one paste content” in the singular sense has been recited in claim 1 from which it depends.

In regard to claim 6, line 3, the claim is indefinite since it recites a plural recitation of “the paste contents” when only “at least one paste content” in the singular sense has been recited in claim 1 from which it depends.

In regard to claim 7, line 2, the claim is indefinite since it recites a plural recitation of “push bars” and “storing cavities” when only “at least one paste content” in the singular sense has been recited in claim 1 from which it depends.

In regard to claim 20, lines 2 and 5, the phrases “the insertion hole”, “the first case” and “the second exhaust port” lack antecedent basis and is indefinite. It is recommended that the claim have its dependency changed from claim 18 to claim 19, which will correct the above antecedent deficiencies.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 2, 6, 27, 28 and 30 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Trocino.

Trocino discloses a device for extracting paste contents comprising all the featured elements of the instant invention.

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-3, 6, 18, 19, 27, 28 and 30 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Smith.

Smith discloses a device for extracting paste contents comprising all the featured elements of the instant invention.

9. Claims 1-3, 6, 18, 19, 27, 28 and 30 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Crocker.

Crocker discloses a device for extracting paste contents comprising all the featured elements of the instant invention.

10. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Byrd.

Byrd discloses a device for extracting paste contents comprising all the featured elements of the instant invention.

Allowable Subject Matter

11. Claim 29 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

12. Claims 4, 5, 7-17, and 20-26 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McMenamin, IV and Gray disclose various devices for extracting paste contents.
